|                       | highest level – against molten metal splashes. Its flame-retardant and antistatic fabric ensures your safety against major industrial hazards, including electrical hazards, allowing you to work with peace of mind in the most demanding conditions.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Web Technical Details | Composition: 74% cotton, 25% polyester, 1% antistatic carbon twill - 320 g/m² Multi-risk: Specially designed for ATEX zones, this jacket offers simultaneous protection against five major hazards: it protects you against heat and flames (EN ISO 11612:2015, E3), spatter during welding and related techniques (EN ISO 11611:2015), liquid chemicals (EN 1304:2005+A1:2009 Type 6), sparks due to electrostatic charges (EN 1149-5:2018), and thermal hazards from electric arcs (EN 61482-2:2020). Enhanced visibility and safety: Certified to EN ISO 20471, Class 2, your safety is enhanced in hazardous environments. Its retroreflective strips increase your visibility in low-light conditions. Adjustable and comfortable: The semi-elasticated cuffs allow for a customized fit to minimize soiling. The elasticated waist and back pleats provide added comfort. Functional: Its numerous pockets facilitate daily organization: 1 chest pocket with a flap closure, hook-and-loop fastener, and hidden plastic snap button; 1 inside left chest pocket; and 2 lower pockets with flap closures and hidden plastic snap buttons. Metal-free: Designed without metal, this jacket ensures increased safety in situations where there is a risk of electrical damage. Clever detail: Its stand-up collar and flap closure with hidden plastic snaps provide complete protection against the many hazards of everyday life. Two loops on the front allow you to attach your detector. |
